Matriculation

April. 2015 – April 2016

71 percent

Experience

Nineleaps

Software Engineer

Jan 2022 – Present

Bengaluru, Karnataka

- ”I’m a front-end developer with 2+ Years of experience in React JavaScript technology. I’ve focused on the FrontEnd domain throughout my career and possess a strong skill set in HTML, CSS, and JavaScript. My experience also extends to the end-to-end workflow of the Software Development Life Cycle (SDLC) for enhancing process modules. Additionally, I’m well-versed in agile Scrum methodology, which aids in effective release planning.”
- Moreover, I’ve had the privilege of working on several exciting projects during my journey as a front-end developer. These projects have allowed me to apply my skills in innovative ways, collaborate effectively with cross-functional teams, and deliver high-quality solutions that meet user needs and exceed expectations. I’m passionate about staying up-to-date with the latest trends and technologies in the front-end development landscape, and I’m excited to continue contributing my expertise to create outstanding web applications and user interfaces

Projects

Yuva Health | *HTML,CSS,JavaScript,React,Redux,MUI,Sonarqube,GitHub,Tailwind CSS,Python*

July,2022-Present

- * The YUVA Health team comprises experienced individuals who come from various domains like insurance, healthcare, and wellness. With the help of technology experts, we have been successful in launching and implementing India first cashless OPD (Outpatient Department) in both Rural and Urban India. Our mission is to use our expertise in technology and healthcare to create digital solutions that are both user-friendly and cost- effective, making preventive healthcare practices more accessible for everyone.
- * Analyzing the requirement and presenting the implementation approach..
- * Code Implementation, Review and Incorporating the feedback over multiple iterations of Agile methodology.
- * Participating in various phases of feature delivery from user story grooming, preparing prototype, feasibility check, design reviews, implementation and testing.
- * Event framework enhancements to integrate different event for new solutions.
- * Bug Fixing for the raised defects in feature and system testing.
- * Understanding the solution design/arch and preparing setup before actual development starts.

Elda Health Application | *HTML,CSS,JavaScript,React,Redux,BootStrap,Sonarqube,GitHub*

March,2022-June2022

- * Elda Health strives to become the one stop holistic health platform for the mid age urban woman. It’s our sincere goal to help women understand their health issues, identify precautionary measures, gain access to meaningful diagnosis, and above all prioritise their own health.
- * Participating in various phases of feature delivery from user story grooming, preparing prototype, feasibility check, design reviews, implementation and testing.
- * Event framework enhancements to integrate different event for new solutions.
- * Bug Fixing for the raised defects in feature and system testing.
- * Understanding the solution design/arch and preparing setup before actual development starts.
