SUMMARY

Results-oriented Engineering Executive with a proven track record of optimizing project outcomes. I specialize in turning ideas into seamless, user-centric applications. My strengths lie in UI/UX design, security implementation, and ensuring seamless user experiences. With a proven track record, I consistently deliver high-quality solutions tailored to client needs.

SKILLS

C++, JavaScript, Python, .NET, React.js, React Native, NodeJS, Fast API, SQL, NoSQL, CI/CD, AWS, HTML, CSS, Typescript, Web Sockets, Figma, UI/UX, Jenkins, Apache JMeter, TailwindCSS

EXPERIENCE

Senior Programmer - Meru Info Solutions

Sept 2022 - Present

Client: Center for e-Governance

- Pioneered the development of Government applications and schemes such as Gruha Lakshmi, Yuvanidhi, Document as a Service, CM Dashboard, Namma Card, Voicebot etc.
- Implemented robust data encryption protocols to ensure the security of applications.
- Proficiently optimized backend operations to efficiently handle large data traffic.
- Implemented robust data cleansing techniques across varied government databases like crop surveys, insurance, fisheries and child health yielding actionable insights. Utilized Power BI visuals to present reports, empowering directors and officials with informed decision-making abilities for community development fund allocation.
- Managed end-to-end application lifecycle, from design and deployment to continuous maintenance, ensuring smooth operations and adherence to project timelines. Collaborated effectively with interdisciplinary teams to achieve project objectives and exceed client expectations.

PROJECTS

Document as a Service

Tech Stack: React JS, Redux, .NET Core, SQL Server

- Implemented a robust system where each the government departments can verify the citizens' educational documents. Which is in streamline to extend it to the corporate
- Along with multi-language support, implemented strong data encryption protocols to maintain the integrity of the system.
- Employed Redux for efficient state management, ensuring seamless data flow and enhanced performance within the application.
- Optimized application performance by implementing code-splitting and lazy loading techniques, enhancing user experience.

CM Dashboard

Tech Stack: React JS, Redux, .NET Core, Node JS, SQL Server

- This is a application showcasing the state's performance in terms of flagship schemes, administration, infrastructure, e-Governance, etc. It mainly focuses on work completed, budget and expenditure visualized with interactive Power BI dashboards.
- Along with multi-language support, to cater to diverse user demographics.
- Optimized application performance by implementing code-splitting and lazy loading techniques, enhancing user experience.

Gruha Lakshmi and Yuvanidhi Scheme

Tech Stack: Node JS, MS SQL Server, Nginx

- Developed and maintained Gruha-Lakshmi application, flagship scheme of the Govt. of Karnataka.
- Demonstrated ability to develop and maintain large-scale, high-traffic applications.
- Received appreciation from the CEO and other officers

- Engaged in Agile Product Development processes, fostering effective collaboration within Agile environments to enhance project development iteratively and efficiently.
- Adopted advanced React Native development techniques, optimizing performance and scalability of applications to meet the demands of a rapidly evolving market landscape.
- Demonstrated leadership in cross-functional teams by implementing best practices in Agile methodologies, driving continuous improvement and delivering projects on time.
- Elevated user engagement and retention rates through the implementation of cutting-edge features, including seamless social sign-in and QR code functionality, resulting in enhanced user experiences and increased app usage metrics.
- By incorporating code quality and security standards by proactively addressing technical debt and leveraging industry-leading tools such as SonarQube and Jenkins for robust CI/CD pipelines, ensuring the delivery of secure and reliable software solutions.

PROJECTS

Markid

Tech Stack: React JS, Redux, Payment Gateway, Responsive Design

- An e-commerce application lets users buy/sell articles for children, where the buyer and seller can negotiate the price over in-app chat.
- Integrated leading payment processing providers to ensure secure and hassle-free transactions, instilling confidence in users and fostering trust in the platform.

Spar Qatar

Tech Stack: React JS, Redux, Payment Gateway, Responsive Design

- Leveraged to ensure seamless user experiences across both web browsers, optimizing performance and reducing development time and costs.
- Implement real-time inventory updates for seamless shopping experience.
- Optimize UI with animated transitions for engaging user interaction.
- Implement a feature that allows users to customize their notification settings within the app, such as opting in/out of promotional offers, new product alerts, or order status updates.
- Enhance the payment gateway integration by supporting multiple payment methods commonly used in Qatar, such as credit/debit cards and mobile wallets

Entry Pass

Tech Stack: React Native, Redux

- An attendance management system based on geo fencing and QR codes
- Implemented push notifications for employees if they exceed the work time / if they didn't check out

EDUCATION

Bachelor of Engineering, Computer Science and Engineering
Malnad College of Engineering, Hassan

2017 - 2021
8.39 CGPA

ACHIEVEMENTS

- Awarded the Best Outgoing Student of Malnad College of Engineering.
- Accomplished athlete with 6 times state-level Netball championship.
- Represented the state twice at National Level Netball championship.
- Awarded by the principal, Malnad College of Engineering for developing numerous applications including Leave Management System, Micro Engineering Certification Platform, Faculty Development Platform with Blogging.
- Awarded by Superintendent of Police, Hassan; for developing **Home Quarantine Monitoring System** and **Leave Management System** for the Police Department. **(MERN Stack Project)**
