Education

Indian Institute of Information Technology, Allahabad

Bachelor of Technology in IT; Grade: 7.45 CGPA

July 2019 – June 2023

Prayagraj, Uttar Pradesh

Star International School

Central Board of Secondary Education; Grade: 84%

June 2018 – March 2019

Ranchi, Jharkhand

Experience

Graviton Research Capital LLP - Gandhinagar

July 2023 – March 2024

Trade and Execution Analyst

Onsite

- Utilized API calls to extract crucial trading data from various exchanges.
- Resolved **production bugs** to ensure seamless operation and stability of software systems, contributing to enhanced reliability and performance of production environments.
- Generated and oversaw essential daily trading data across multiple exchanges and designed algorithms for easy monitoring of **trading strategies to maximize profit**.
- Developed automated tools and scripts to perform complex analysis of data for different exchanges across globe. Handled the exchanges of Chicago, London, Israel and Turkey.
- Worked on tools and wrote the scripts to generate reports, graphs etc providing valuable insight for the **evaluation of strategies, software latencies** etc.
- Implemented a data verification process to cross-reference information obtained from **Bloomberg** and brokers with the data acquired after executing the scripts.
- Developed software tools to generate latency reports, categorizing orders based on their type: Immediate or Cancel (IOC) and Good 'Til Canceled (GTC), facilitating the formation of distinct order buckets for analysis. Conducted in-depth analysis of these order buckets, including daily profit and loss assessments, for multiple trading strategies, optimizing decision-making processes and enhancing overall performance.

Skills

- **Experienced:** C , C++ , Git , Pandas
- **Intermediate:** Java, Python, SQL, Linux
- **Coursework:** Data structure and algorithms, Operating systems, Database management system, Object oriented programming

Projects

Not a Blog

Jan 2022

- Designed and implemented Backend for a Blog Application with posts, comments and category management features.
- Users can post blogs based on category, add multiple comments on the blog and browse blogs based on category, after being authenticated.
- Implement pagination to limit the number of blog posts displayed per page, improving performance and user experience.
- Allow users to sort blog posts based on various criteria, such as date, title, number of comments, etc.

Accomplishments

- **NISM (National Institute of Securities Market)** certified - 2024
- **KYPY Scholar** 2017
- **NTSE Scholar** 2016
- **Rank 535** in Codeforces round 751
- **Rank 928** in Codeforces round 745(Div. 2)
- Achieved **Rank 139** in Codechef START22B
- Expert (Max Rating **1658**) in Codeforces; 5 Stars (Max Rating **2083**) in CodeChef
- Secured **AIR 6954** in JEE Advanced 2019.
- Secured **AIR 4894** in JEE Main 2019.

Coding Profiles

- **Expert** at **Codeforces** | Max. Rating - 1751
- **Guardian** at **Leetcode** | Max. Rating - 2397
