SUMMARY

With around 3 years of experience as a software engineer specializing in developing distributed full-stack applications, I am eager to explore opportunities that allow me to expand and diversify my problem-solving skills.

EXPERIENCE

Senior Software Engineer(SDE - 2), Rebel Foods (Formerly Faasos) *Jul 2023 - Present*

- **Multirun Optimization:** Implemented multirun optimization algorithms to efficiently assign drivers to multiple delivery orders within a single trip, reducing costs, improving resource utilization, and enhancing customer satisfaction.
- **Magicpin Integration:** Integrated Magicpin's third-party riders in a week, addressing rider shortage. Now, delivering 2000 orders daily propels a monthly revenue increase of 32 LPA.
- **Store Console:** Orchestrated backend development of a central application enabling seamless creation and updating of store settings, pivotal for operations team in managing configurations. This reduces store settings update TAT from 24hours to 5 min.
- **Poter Integration:** Integrated third-party delivery provider porter to facilitate dedicated riders for recently onboarded Smoor stores.
- **Tech Optimization:** Significantly reduced latency from approximately 400ms to an impressive 70ms for our cutting-edge Rebel+ driver allocation system.
- **Technologies used:** NodeJS, Javascript, ExpressJs, MYSQL, Redis, MongoDB, ElasticSearch, Kafka.

Software Developer Engineer(SDE-1), Rebel Foods (Formerly Faasos) *Jul 2021 - Jun 2023*

- **Driver Allocation Management:** Developed and maintained a robust driver allocation system to efficiently assign riders to delivery orders, ensuring timely and accurate deliveries.
- **Third-Party Integrations:** Successfully integrated our platform with third-party delivery services, including Shadowfax, Dunzo, and Loadshare, enabling seamless order routing and tracking capabilities.
- **Delivery App Backend:** Worked on handling the backend of the Trax app, the driver-facing application, ensuring smooth functionality and seamless user experience for our drivers.
- **Technologies used:** NodeJS, Javascript, ExpressJS, MYSQL, Redis, MongoDB, ElasticSearch, Kafka.

Software Engineer Intern, NCR Corporation

Mar 2021 - Jul 2021

Worked on improving UI and UI test using Asp.net and Coded UI.

SKILLS

Programming Languages: C++, Javascript, Typescript

Frontend Development: HTML, CSS, Javascript, ReactJs,

Backend Development: NodeJS, ExpressJS, Kafka

Core CSE Subjects: DBMS, Object Oriented Design, SQL, Data Structure and Algorithms

Databases: MYSQL, Redis, MongoDB, ElasticSearch

EDUCATION

Bachelor of technology(B.tech), Computer Science and Engineering

Aug 2017 - May 2021

Harcourt Butler Technical University(HBTU), Kanpur

GPA: 8.5

AWARDS AND ACHIEVEMENTS

Mountain Mover by Rebel Foods

Awarded the prestigious Mountain Mover award in recognition of successfully migrating the legacy driver service to the new Rebel+ driver service, resulting in significant improvements and contributions to the company.

Hackerrank Node.js (Intermediate) & Node.js (Basic) Assessment Certificate

<https://www.hackerrank.com/certificates/06f5642d46ac>

Value for Victory by Rebel Foods(H1 2023)

Received the esteemed Values for Victory award in recognition of outstanding contributions to driver allocation enhancements, which encompassed significant strides in multirun efficiency and a steadfast commitment to enhancing system stability.

Quarterly Award Winner (oct-dec 2023) - Ownership Ninja

Honored with the Ownership Ninja award for seamlessly integrating Magicpin, solving rider shortage, and delivering 2000 orders daily, resulting in an impressive monthly incremental revenue of 32 LPA. This accolade reflects my commitment to excellence and impactful contributions to business growth.
