

AVINASH B S

Senior Software Engineer

A versatile, high-energy technocrat with rich experience in analysis, design, and code development from business requirements and production support; targeting roles as **Senior Software Engineer or Senior Python Backend Developer** to leverage extensive technical acumen and leadership skills in driving innovative software solutions with organization of high repute.

Bangalore

EDUCATION

Bachelor of Engineering (Computer Science and Engineering) Global Academy of Technology, Bengaluru in 2021

PROFILE SUMMARY

- ❖ **Result-oriented professional** with nearly 3 years (August 2021 - Present) of experience in **Software Development, specializing in backend development (Python)**.
- ❖ Excellence in implementing **Agile-Scrum Methodologies** to add value to the deliverables; working with consultants in identifying process improvements in deliverables; developing methods to achieve delivery of desired results.
- ❖ Experienced in building automation scripts using **Boto3 SDK** for provisioning and maintaining infrastructure on AWS.
- ❖ Skilled in **mapping clients' requirements & providing the best solutions** involving evaluation & definition of the scope of the project and finalization of project requirements; **designed and implemented** security solutions.
- ❖ Skilled in utilizing frameworks such as **Fast API, Flask, and Django** for building robust backend solutions.
- ❖ Well-versed in both **SQL and NoSQL database management with PostgreSQL, MySQL, and NoSQL databases like Mongo DB, Redis, and Neo4j**.
- ❖ Excellent in **end-to-end application development**, from requirement gathering to API design and client delivery.
- ❖ An effective communicator with **honed interpersonal, problem-solving, team building, and analytical skills**; capability to think out-of-the-box and contribute ideas towards business excellence.
- ❖ Developed an **API documentation system using Fast API**, facilitating seamless interaction between clients and microservices deployed across different domains with accessibility using a **token-based authentication** system.

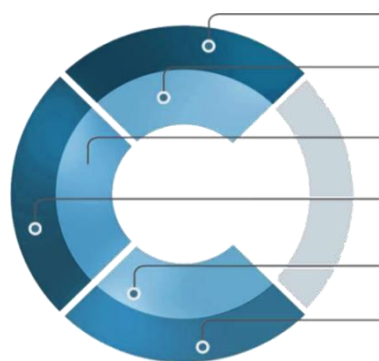

CORE COMPETENCIES

- | | | |
|----------------------------------|---------------------------------|------------------------------------|
| ➤ Software Development Lifecycle | ➤ Coding / Design / Development | ➤ Asynchronous Programming |
| ➤ Agile-Scrum Methodologies | ➤ Backend & Unit Testing | ➤ Requirement Gathering & Analysis |
| ➤ Root Cause Analysis | ➤ API Development | ➤ Data Modelling |

SOFT SKILLS

Analytical
Collaborator
Communicator
Innovator
Motivator
Critical Thinking

TECHNICAL SKILL

- ❖ **Flask, Fast API, and POCs on Django** Frameworks for API development
- ❖ **Python** Programming for backend development
- ❖ **Asynchronous** Programming for efficient operations
- ❖ **SQL and NoSQL** for database management
- ❖ Version Control/Git for code management
- ❖ API Testing with **Postman and Talend API**.
- ❖ **Git / Git Lab, Big Bucket**
- ❖ Automation Scripts using **Boto3**.
- ❖ Introductory **Docker and Kubernetes** Comprehension
- ❖ Tools: **PyCharm, VS Code, Table Plus, Mongo Compass, Studio3T**,
- ❖ Libraries: **I graph, Neo4j**.
- ❖ Payment Gateway: **Shopify**, Message Streaming: **MQTT, Redis Pub-Sub, Kafka**

WORK EXPERIENCE

August 2021 – till date with Knowledge Lens - A Rockwell Automation Company | Senior Software Engineer

Key Result Areas

- ❖ Coordinating with users for **requirement gathering**; preparing functional specifications and low-level design documents.
- ❖ Customizing development plan, code, and design to ensure client satisfaction & delivery of a project on time within the SLAs.
- ❖ Evaluating and mapping user needs and software requirements.

- ❖ Driving efforts towards the maintenance of software development practices; adhering to **company standards for coding and unit/ functional test coverage**; monitoring & motivating the team to produce excellent results.
- ❖ Preparing **high-level functional, technical, and detailed design** documents according to the system requirement specifications.
- ❖ **Designing, developing, testing, troubleshooting, and debugging the applications**; providing post-implementation, application maintenance, and enhancement support to the client with regards to the product/software application.
- ❖ **Reviewing and analyzing** the effectiveness and efficiency of existing systems and developing strategies for improving or further leveraging these systems.
- ❖ Working in the development of multiple Python Flask, Django, and Fast API services aligning with intricate business rules.
- ❖ **Developing a code base with necessary utils** for the first E-commerce web application ever developed by Knowledge Lens.
- ❖ Examining & resolving the defects and complex issues raised during various testing phases.
- ❖ Ensuring all key **processes are completed accurately within the timeframe**.
- ❖ **Lead the project in the absence of leads and managers**, meanwhile working on microservices and resolving issues.
- ❖ **Awarded for the multiple extra mile ideas** suggested throughout my profession in the company.
- ❖ Designing and establishing software applications for clients and coding different modules using the latest technologies
- ❖ **Facilitating end-to-end delivery of the project**, meeting internal and external objectives:
 - Estimation, risk, scope, time, resource, quality, and change management.
 - Value-adds, continuous process, and productivity improvement.
 - Expectation management of team

PROFESSIONAL PROJECTS UNDERTAKEN

Vulnerability Resolution and Bug Support for Client Website (Sep 2021 – April 2022)

Tools & Technologies Used: Python, Flask, PostgreSQL Database, Minio, and Bitbucket technologies for seamless development to ensure no vulnerability exists in the website.

- ❖ Identified and addressed various vulnerability issues present in the client's website, ensuring the security and integrity of the platform.
- ❖ Played a crucial role in coordinating with internal development teams to implement robust security measures and fixes, also acted as the project lead, overseeing all aspects of the project.

Survey Automation Tool for Healthcare Entities (April 2022 – Dec 2022)

Tools & Technologies Used: Python, Fast API, Framework, Postgres, GitLab, S3.

- ❖ Spearheaded the design and development of the survey automation tool, collaborating closely with healthcare professionals to understand their specific requirements and workflow needs.
- ❖ Implemented robust backend functionality to automate the distribution of surveys to patients at appropriate stages of their treatment process, leveraging automated triggers and scheduling mechanisms.

Printer Machines Management Website (Dec 2022 to Oct 2023)

Tools & Technologies used: Python, Fast API Framework, Postgres, MongoDB (NoSQL), Git, Minio.

- ❖ Established the code base for the website, leveraging industry best practices and scalable architecture patterns to ensure robustness and maintainability.
- ❖ Developed backend functionality to support core features such as lease contract management, rental options, printer purchasing workflows, and maintenance service scheduling.
- ❖ Used **WebSocket** (communication protocol that provides full-duplex communication channels over a single TCP connection.) for continuous data storage of a chatbot created for customer support.

Root Cause Analysis Dashboard for Industry Alarms (Nov 2023 - Current)

Tools & Technologies used: Python, Fast API, Postgres, MongoDB (NoSQL), Neo4j, Git Lab.

- ❖ Spearheaded the development of the root cause analysis dashboard, collaborating closely with domain experts and stakeholders to understand alarm triggers, industry workflows, and operator requirements.
- ❖ Designed and developed a knowledge graph representation for alarms, utilizing graph database technologies to model alarm dependencies, causal relationships, and recommended actions.

AWARDS AND RECOGNITION

- ❖ **Award:** Flexible employee.

For leading the project in the absence of leads and managers as well as cooperating with the team on functionality issues on the website

- ❖ **Award:** Going above and beyond.

For working on the end-to-end web development process, right from code setup to handing over projects to clients.

PERSONAL DETAILS

Languages Known: English, Kannada, and Hindi

Address: Bengaluru

Date of Birth: 15th August 2000
