Senior Software Engineer

+91-9212280987 | divya.mcs19.du@gmail.com | <https://www.linkedin.com/in/divya-singh-115aa3172>

Experienced Senior Software Engineer with 3.5 years of expertise in developing robust web applications using React.js and Django. Renowned for delivering high-quality solutions that exceed client expectations and address real-world problems. Adept at full-stack development, with a proven track record in crafting efficient, scalable software. Eager to leverage my technical skills and development experience to contribute and grow in a dynamic Full-Stack Developer role.

Educational Background

Department of Computer Science, University of Delhi

Masters of Science in Computer Science, 2021
CGPA 8.5

Keshav Mahavidyalaya, University of Delhi

Bachelor of Science (Honors) in Computer Science, 2019
CGPA 8.86

Work Experience

Nagarro Software Private Limited , Gurugram, Haryana (Jan 2021- Present)

Current Designation : Senior Engineer

Current Project : File Management System (Backend Developer Role)

- Django application to streamline user management and document sharing process.
- Restricted Signup by Anonymous user for security , only Invited users will able to Signup using Valid invitation Link received over Email.
- Having secure login with account verification using OTP verification via call or SMS.
- In file management, admin would upload documents, with the ability to bulk upload (can have 400 files in one go) and based on the name of each document, it would be shared with specific company or member of the company.
- Role based access to all users for all CRUD operations.
- Account Lock feature will lock account after 'n' number of failed login attempts.

Skill Set

Programming Languages

Python, JavaScript, C++, C#, HTML, Typescript

State Management Libraries

MobX, Redux

Frameworks, Tools & Libraries

React JS, Django framework, JIRA, c3.js, Github Co-Pilot, Stripe, In-app-purchase, Celery, Celery Beat

Version Control Tools

GitLab, GitHub

Identity and Access Management Tools

Key-Cloak server, Okta server

Other Skills

Problem-solving, Communication, Teamwork, Time Management

Style Sheet Languages

CSS, SASS

Database

PostgreSQL, Redis

Platforms & IDEs

Postman, Sendgrid, Firebase Push Notifications, Twilio, Pycharm, VScode, PGAdmin4, Microsoft Azure, Docker, Voximplant

API Design Architecture

RESTAPIs, GraphQL, Webhooks

Code Quality Review Tools

ESLint, sonarQube

Projects

- **Fast Driver (Backend Developer Role) :**
 1. Django application to handle user authentication, order management, and communication to connect the Driver, Distributor, and receiver
 2. Implemented user authentication features including signup, login, logout, forgot password, and change password using Two-Factor Authentication with OTP verification via SendGrid.
 3. Real time Notifications are sent using Firebase to facilitate communication between drivers and distributors
 4. Distributors/Receivers can track the location of the driver to know the status of their delivery.
 5. Ability to create, manage, and track orders throughout the pickup and delivery process.
 6. Managed Stripe integration for package subscriptions, resulting in a seamless payment process for users.
- **Account Buddy (Backend Developer Role)**
 1. Implemented a buddy system allowing users to send, accept, or decline buddy requests, establish buddy connections, and manage relationships by blocking or reporting buddies, with real-time chat functionality.
 2. Utilized Firebase Cloud Messaging for real-time notifications.
 3. Designed a comprehensive dashboard featuring task management (TODO list), journal entries, activity tracker, mood tracking, and appointment scheduling capabilities.
 4. Integrated Twilio for live video call functionality, enabling users to engage in random one-to-one video calls and connect with new buddies dynamically sharing similar preferences.
 5. Implemented an auto subscription feature with support for both monthly and yearly subscriptions, utilizing IAP webhooks for seamless payment processing and subscription management.
- **PMO Tool (Full Stack Developer Role):**
 1. Created a web application for client using React JS, Python Django, PostgreSQL and Keycloak server.
 2. To manage projects, resources, and their allocations efficiently by collection of Statements of Work (SOWs) and other critical details.
 3. Dynamic rendering of components based on user configuration, in dynamic table with dynamic rows, columns & features.
 4. Implemented dynamic components such as Grid, Form, and Filter based on user's configuration.
 5. Integrated charts into the application using the C3 library and utilized GraphQL for querying and mutating data tables.

Awards & Achievements

- 'The Rookie' Award : Most Promising Fresher Award by Nagarro
- Nominated for Cheerboard as Nagarro Applause Program

Extra-curricular Activities

- Participated in ZooHackathon , WWF India , 2019
- Organized BlitzKreig'18, 19 & Sankalan '20 , technical fests of DU
