☎ +91-9818366856/9910675006

Executive Profile

- Skilled in building software using languages and technologies of the **Microsoft.NET** including ASP.NET, ASP.NET CORE, Entity Framework and MVC
- Extensive knowledge and exposure in **Software Development Lifecycle (SDLC)** right from business analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications
- **Hands-on working experience with:**
 - Web API, SOA and Entity Framework, Azure AD, Azure DevOps
 - RDBMS including Normalization of Database Schema, writing Stored Procedures, User Defined Functions, Triggers, Views and Joins in SQL
- Extensive **project coordination & implementation** experience right from requirement gathering & analysis to developing codes & performing unit testing for maintaining the quality of proposed applications in agile framework
- Proven expertise in **spearheading entire gamut of sprint activities** inclusive of sprint planning, release planning, backlog grooming, task management, scrum-of-scrum, retrospectives, sprint retrospective and sprint demonstration
- **Versatile, high-energy professional with passion for the excellent database design** with experience in data security, scalability, and performance; successful in achieving business growth objectives within turnaround & rapid changing environment with excellent communication, people management, analytical and problem-solving skills

Education & Credentials

- **2009:** Master of Computer Applications from Maharishi Dayanand University
- **2003:** Bachelor of Commerce from Delhi University

Technical Skills

- **Microsoft Technologies:** ASP.net 2.0/3.5/4.0, MS.net Framework 1.1/2.0/3.5/4.x, .Net Core, WPF, WCF REST and SOAP services, WEB API, MVC, SQL
- **Scripting Languages:** C#, Asp.net, .Net, .Net Core, JavaScript, HTML, jQuery, Angular, XML, CSS3, Bootstrap
- **Environment:** IIS7, Azure
- **Operating Systems:** DOS, Windows 10
- **RDBMS:** SQL Server 2005/2008/2016, Oracle 11g
- **Application Tools:** Visual Studio .net 2019 and Visual Studio Code, Toad, SQL Plus, Oracle SQL developer, SSMS
- **Problem Ticket Management:** Assembla, Bugzilla, Azure DevOps
- **Source Code Management:** VSS, TFS, VSTS, SVN, GIT

Certifications

- Certified Scrum Master
- Microsoft Azure Fundamentals

Key Impact Areas

Software Development Lifecycle	Requirement Gathering & Analysis
Client Interaction & Coordination	Project Management
Coding & Deployment	Team Management
Service-oriented Architecture	Azure DevOps

Career Timeline

Aug'19-Present	Xceedance Consulting India Pvt. Ltd. as Technical Team Lead
Dec'16-Aug'19	Plasma Computing Group as Technical Lead
Jul'13-Dec'16	World Fashion Exchange as Team Lead
Feb'13-Jun'13	Saffron Tech Pvt. Ltd. as Senior.net Developer
Nov'11-Feb'13	VRVirtual.com Pvt. Ltd. as Software Engineer
Jul'10-Nov'11	Rite Infotech Pvt. Ltd. as Associate Software Engineer

Professional Experience

Aug'19-Present Xceedance Consulting India Pvt. Ltd. as Team Lead
Dec'16-Aug'19 Plasma Computing Group as Team Lead
Jul'13-Dec'16 World Fashion Exchange as Technical Lead
Feb'13-Jun'13 Saffron Tech Pvt. Ltd. as Senior.net Developer
Nov'11-Feb'13 VRVirtual.com Pvt. Ltd. as Software Engineer
Jul'10-Nov'11 Rite Infotech Pvt. Ltd. as Associate Software Engineer

Key Result Areas:

- Participating in the development and review of business and system requirements to obtain a thorough understanding of business needs in order to deliver accurate solutions
- Developing requirement specifications that can be shared with technical resources for the creation of proposals and system development
- Encouraging iterative development approach within the organization and training the fellow employees on different agile frameworks (SCRUM) across organizations
- Devising overall technical strategies for external client projects from technical requirements to build plan
- Communicating with external clients on a regular basis regarding progress, challenges, timelines and end results of client projects
- Performing application development (coding), estimation, designing & code reviews, Unit/Integration testing, supports User Acceptance testing and Functional Testing, creating deployment/implementation plans
- Spearheading a team to ensure that client expectations are met and that the team adheres to project schedules and budgets
- Assisting in the front-end development and documentation, UI development and supporting other developers in methodology documentation when needed
- Developing database objects such as Stored Procedures, Functions, and packages, Indexes, Views, materialized views and Triggers
- Contributing to the development of product technical design and working with the Technical Architect on the integration of products into the IS

Highlights:

- Acted as consultant for performance optimization (Frontend and backend) and security enhancements on web-based applications
- Performed Code Review and refactoring addressed performance and security issues
- Addressed issues such as security, database performance, slow report generation and exception handling
- Facilitated customization of systems by encouraging software engineering team to adopt emerging standards for software application development architecture and tools
- Re-Wrote the JavaScript & JSON base framework for WFMS application; Upgrading the application performance, reducing response time up to 80% (Plasma Softech)
- Implemented business model, workflow, HP ALM integration, Workspace
- Led a team of Senior Software Engineers, allocated task and created a Build Plan and ensured quality work
- Created Service for sending transaction log and Reports related to Project
- Provided training and support to new joiners and ensured that they make progress
- Implemented Agile methodology to add value to the deliverables; working with consultants in identifying process improvements in deliverables

Project Annexure (Few Recent Projects)

Period: Ongoing

Client: AT&T, USA

Technology Used: C#, Asp.Net, Oracle 12G, Java Script

Description: Device Certification Application. Workflow Management, Business Model Management, Integration with HP ALM for bug tracking, SSO, SAML, Waiver Management, SMEs approval management, Workspace management for files. User Role Management

Application was developed to certify the devices submitted by AT&T Partners. As a business solution provider, we had developed this application using Workflow and business model to keep the things 100% dynamic and provide visibility to partners and AT&T team. Based on the role and permission partners and AT&T users could act on the certification flow. During the process bigger files are being uploaded by the partners and hence to make this file management easier we had developed a workspace for files. Application was integrated with HP ALM for better management of bugs. Single Sign On and SAML was used for strong authentication and ease of users.

Role: Team Lead

Period: Sep'19–Oct'20

Client: Berkshire Hathaway Specialty Insurance, U. K.

Technology Used: C#, .Net Core, Rest API, Angular 9 and MS SQL Server 2016

Description: BerkSure is aimed to increase the efficiency by moving the North America region's business from excel to web-based application which will enable users to process & handle 'Insureds' seeking Surety 'Policies' and streamline their underwriting process. BerkSure Application will provide a centralized operating platform that will greatly enhance the efficiency, quality and scalability including workflow, critical activities and how information is accessed, promoting profitable and cost-efficient Surety growth. Key outputs include simplified process and increased competitive differentiators through improved risk selection and exposure management as well as timeliness and quality of responses delivered to customers.

Role: Team Lead

Period: Oct'18–Aug'19

Client: Landmark, Australia

Technology Used: C#, .Net Core, Rest API, Angular 6 and MySQL

Description: Web based application for trading in livestock integrated with SAP application. Through Opportunity and contract modules user can create opportunities i.e. details of Livestock can be filled. Once opportunity is created, user can send the details further and bidding can be performed. Created opportunity can be converted into Contract as well and the Contract signing process is completed. After sale is completed, the details will be transferred to CRM for Sale processing.

Role: Team Lead

Period: Mar'18–May'18

Client: RBTracker, Malaysia

Technology Used: C#, Asp.Net MVC, MS SQL Server 2014, Java Script, jQuery

Description: This is a workflow-based web application helps to improve the current reporting transfusion adverse event process, which is time consuming, and somehow the adverse event is not reported to the blood bank for investigation. This application has made the procedure of reporting adverse event more effective and efficient. The application also ensures that every step of the procedure is followed by the medical staff and tracks the progress of investigation on the adverse event.

Role: Architect

Period: Mar'18– May'18

Client: WFX Web ERP, Multi-Country

Technology Used: C#, .Net, MS SQL Server 2008, Java Script

Description: Cloud-based enterprise software for the fashion industry with over 450 customers across the United States, Europe, and Asia. WFX Web ERP increases efficiencies, brings down lead times, enables costing control, helps in purchase, production cycles, reduces wastages and helps in enabling better sourcing & retail supply chains.

Role: Technical Lead
