PERSONAL PROJECTS

ADMIN DASHBOARD

- The Admin portal website, constructed with ReactJS + Redux and styled with Sass, features a dashboard with basic analytics charts/graphs and a searchable, sortable, and filterable listing screen.

HOTSTAR CLONE

- A visually stunning full-stack web application developed with ReactJS and Firebase, showcasing movies and shows from Firestore, including a detailed page with brief overviews of selected content.

ECOMMERCE WEBSITE

- An E-Commerce application with full-stack capabilities, utilizing Firebase authentication for user sign-in and registration, enabling users to add products, create orders, and navigate through product details, a cart page, and a checkout page.

NETFLIX CLONE

- A Netflix clone website utilizing the TMDB API to fetch and display the latest movies and TV shows, categorized by different genres.

ACHIEVEMENTS

Member of Small Step Organization NGO

Engaged collaboratively in the mission of Small Step Organization, a non-profit dedicated to community development.

CTO Appreciation

Received several appreciations from CTO as well as Onshore & Offshore leads for on-time delivery of projects and meeting deadlines consistently.
