

NEHA CHAUHAN

Pune, Maharashtra, India

☎ +91 9521409127 ✉ cneha825@gmail.com 🌐 <https://www.linkedin.com/in/neha-30-chauhan/>

Education

National Institute Of Technology, Karnataka

Bachelor of Technology in Information Technology

July 2017 – May 2021

Surathkal, Karnataka

Technical Skills

Programming Languages: Java, C, C++, Python, JavaScript, HTML5/CSS

Framework and Platform: Spring Boot, REST, JDBC, React

Developer Tools: VS Code, IntelliJ, Eclipse

Testing: Enzyme, JUnit, Mockito

Infrastructure and Deployement: mySQL, CI/CD, Git, AWS S3, AWS Lambda

Relevant Coursework: Data Structures and Algorithms, DBMS, OOPs, Design Patterns

Work Experience

John Deere

July 2022 – Present

Senior Software Engineer

Pune, Maharashtra

- Designed and developed an application feature that streamlined price updates by enabling users to upload data directly, eliminating manual file exports, resulting in a total time savings of nearly 400 minutes across 100 programs.
- Migrated the CI/CD pipelines from Azure to GitHub Actions, achieving significant cost savings, improving the software development life cycle.
- Automated File Transfer from AWS S3 to SharePoint using AWS Lambda Function.
- Developed an AI chatbot during a hackathon to serve as a cost-effective alternative to a traditional "Walk Me" system, resulting in a reduction in average response time for common queries by 5 minutes, improving customer satisfaction.
- Played crucial role in streamlining the process of updating prices for a machine part across multiple programs, resulting in significant reduction in total turnaround time (around 99%).
- Successfully managed a 6 project involving 25 interns, collaborating with multiple teams to identify and address their specific requirements.

John Deere

July 2021 – July 2022

Graduate Engineer Trainee

Pune, Maharashtra

- Automated a monthly price report delivery process for end users using a Quartz scheduler, reducing manual effort by 4.5 hours and achieving a 13% error rate reduction.
- Built a REST API for exchange rate calculations, enabling users to recalculate, equalize, or retain program prices. This led to reduction in manual adjustment by 40%. The feature streamlined pricing processes across 200 programs.
- Implemented multiple quick UI features in React, streamlining user interactions and enhancing the overall user experience.

Citi Bank

May 2020 – June 2020

Software Analyst Intern

Pune, Maharashtra

- Developed and published a .NET logging utility library to improve real-time data troubleshooting capabilities.
- Expedited the identification of root causes for application failures through the implementation of effective logging techniques.
