

Omkar Damle

SUMMARY

A self-driven software engineer passionate about learning and building meaningful projects. Exploring the world of full-stack (Django & React) data driven development.

SKILLS

Git
Django
Zoho
jQuery
JavaScript
Postgres
Python

Natural Language Processing(NLP)
Deep Learning
Express

NodeJS
Scrum methodology
HTML/ CSS
Full-stack Development

Tortoise SVN
Agile
React
Cassandra
Kafka

EXPERIENCE

Software Engineer -07/2019 - 03/2021, *Bangalore*

Hotel Hub LLP

Achievements/Tasks

- Worked as a Full-Stack Developer
- Won a Hackathon by building an Alexa skill and combining it with Azure chat Bot
- Implemented an ML Algorithm to predict Hotel rates using RNN

Software Engineer

Emproto Technologies Pvt. Ltd. 06/2021 - *Present, Bangalore*

- Worked as a node-js backend engineer as part of multiple teams, mentored juniors and shared responsibility for hiring new candidates
- Worked on technologies such as React.js, django, Kafka, Cassandra etc.
- Worked as a team lead, handled communication with clients on behalf of Emproto
- Worked as a data engineer for a client with Django and python as language with AWS platform

PROJECTS PERSONAL

PROJECTS

Table Extract (02/2021 - 03/2021)

- Extracting information from tabular data like receipts, bills etc. Implemented using TensorFlow, Open-CV and Camelot

Answer Finder System (06/2018 - 06/2019)

- Integrating traditional NLP techniques and the latest neural networks to mine text for answers

Pomodoro Timer (03/2020 - 04/2020)

- A vanilla JavaScript(ES-6) based timer to aid in the Pomodoro productivity technique.

Alexa (03/2020 - 03/2020)

- Building an Alexa skill for users to converse with and book hotel tickets

EDUCATION

Bachelor of Computer Engineering

Goa College of Engineering

03/2015 - 06/2020,

Farmagudi, Goa

Courses

Computer Engineering

Higher Secondary - Science

Dempo higher secondary

05/2013 - 05/2015,

Panaji, Goa (87%)

Courses

ACHIEVEMENTS

Internal Hackathon (03/2020 - 03/2020)

Won an internal Hackathon organized in the company

Table Extract

Implemented a system to scan bills, receipts to read data and convert into objects from scratch.

Chat-bot

Implemented a chat Bot from scratch using machine learning with Python, TensorFlow, Keras and other libraries as a personal project.

Chess (01/2012 - Present)

Participated in multiple state/ national/ international chess championships winning high ranks in some
