## SUMMARY

Results-driven and highly skilled REST API Java Developer with 4.9 years of experience in designing, implementing, and maintaining robust and efficient web services. Proficient in Java, Spring boot, Hibernate, SQL and other cutting-edge technologies, I have a proven track record of delivering high-quality software solutions that enhance system performance, scalability, and security. With a passion for staying updated on industry best practices and a commitment to excellence, I am well-equipped to contribute to your team's success by crafting innovative and reliable RESTful APIs.

## EDUCATION

### Pune University

Bachelor's Degree in Information Technology  
2016 - 2019 -9.15 GPA

### Mumbai University

Diploma in -Computer Technology  
2013 - 2016 - 88.98%

## TECHNICAL SKILLS AND TOOL

- Java 17
- Spring Boot
- Spring Hibernate
- SQL
- REST Service
- Jenkins
- Kibana
- Rancher
- GIT,Copilot
- Confluence
- Open search

## CERTIFICATIONS

- Scrum development with JIRA
- and IRA Agile by PluralSight.
- Performance tuning by LinkedIn learning
- Java Memory Management by LinkedIn Learning
- GraphQL Essential training by LinkedIn learning

## PROFESSIONAL EXPERIENCE

### Senior Software Engineer

- Requirement gathering, working with cross functional teams,product owners and developers for understanding the use case,designing the APIcontracts, developing and testing the API's.
- Also worked on ETL's, where we have to load data from different servers and transform to the required formats and store them in our databases.
- Looking into production support tasks and adding hotfix.
- Used SonarQube for continuous inspection of Code quality to perform automatic reviews with status analysis of code bugs,code smells and security vulnerabilities.
- Followed test driven development approach using JUNIT and MOCKITO
- Wrote maintainable and extensible code in a team environment and documented all the details.

### Projects

- Worked on project to get real time data via RabbitMQ from source system, transforming, storing and making that data accessible via API to all the cross-platform teams.
- ·Migration of spring boot.
- ·Migration of Java 8 to Java 17
- ·Integration of open search with REST API

### Rewards and Recognition

- Awarded for developing, designing and implementing new feature in 2021 Q2
- Award for outstanding performance in 2021 Q3
- Award for outstanding performance in 2022 Q2
- Award for outstanding Team performance in 2023 Q3
- Data driven value Award in 2023 Q4
- Awarded Ad Infra Awards - Honorable Mentions 2024 Q1
