EDUCATION

Birla Institute of Technology - Mesra, India

2020 - 2024(present)

Bachelors Of Technology Electronics and Communication Engineering

GPA: 8.44/10.0

SKILLS

Languages

C++, JavaScript, HTML/CSS

Technical Skills

Data Structure and Algorithms, Competitive Programming

Technologies/Frameworks

NextJS, GitHub, Vercel, Netlify

Concepts

Object-oriented Programming(OOPS), Operating System(OS),
Data Base Management System(DBMS), MYSQL

PROJECTS

AI-PromptHub : <https://ai-prompthub-flax.vercel.app/>

Oct, 2023 - Jan ,2024

- Conceptualized and developed a full-stack, dynamic prompt-sharing web application empowering users to create, share, update, and delete creative prompts. Implemented full CRUD functionality, enabling effortless prompt management, including copying prompts for enhanced productivity, and incorporated a real-time search bar feature for quick and efficient retrieval of prompts based on user queries.
- Successfully implemented responsive design for mobiles and tablets ensuring seamless user experience across various devices and screen sizes including PCs and mobile phones.
- Employed Next.js for efficient server-side rendering, React Router for consistent routing, and robust MongoDB databases, ensuring high-performance data storage and retrieval. Implemented secure OAuth authentication via Google using next-auth to enhance user account security and streamline login processes.

Meme Gallery : <https://meme-gallery-rana-samridh.netlify.app/>

May, 2023 - Oct, 2023

- Developed a dynamic web application for browsing and limitless memes, integrating the Reddit API to fetch real-time content from various meme communities.
- Utilized Next.js for front-end development and integrated with the Reddit API for dynamic data retrieval demonstrating API integration, data rendering, and user interface design.

Simon Game : <https://3sgtwv.csb.app/>

Jan, 2023 - May, 2023

- Created an engaging Simon memorization game that challenges players' memory by blinking colored tiles along with sounds. Players are required to replicate sequences for each level, enhancing their memory and cognitive skills. Utilized JavaScript, HTML, and CSS for frontend development, demonstrating proficiency in frontend technologies and interactive design.

ACHIEVEMENTS

- Codeforces rated-Pupil
- Flipkart GRiD 4.0 - Software Development challenge, qualified for level 2.
- IEEE Mega Project – Finalist.
- Solved More than 500+ problems on various Coding platforms.
- Qualified JEE Main(top 3 percentile) and JEE Advance(AIR-16,000).

LEADERSHIP

General-Secretary : IETE Club, BIT Mesra.

May, 2022 - May, 2023

- Responsible for the overall functioning of one of the technical clubs of BIT MESRA. Organized various events including Hacktober Fest 2022 and Detective David.
