KEY SKILLS

Programming Language

- Java
- Spring
- Spring Boot
- Restful API
- Maven
- SAP UI5

Database

- SAP HANA
- MySQL
- Firebase Realtime DB

Framework

- GenAI
- Messaging Queue
- Multitenancy
- Microservice Architecture
- SAP BTP
- SAP CAP
- Cloud Foundry
- SaaS / PaaS
- Android Studio
- Github

Devops

- Jenkins
- Dynatrace
- Kibana

PROFILE

An enthusiastic developer who is ready to invest his knowledge and skills in learning new aspects of the field and implementing them for the benefits of the organization and self to move up the ladder.

EXPERIENCE

SAP LABS INDIA PVT. LTD. • AUGUST 2019 – PRESENT

SAP Omnichannel Promotion Pricing - (Software Developer and Devops Engineer – July 2023 - Present)

SAP Omnichannel Promotion Pricing is a sales cloud channel solution ensures consistent pricing by running the same calculation logic based on the same price and promotional data.

Achievement's/Task's

- Solution which can help a Promotion Planner to create promotions based on the history with the help of **Generative AI**.
- Worked with project managers, developers, quality assurance and customers to resolve production issues.

Birla Institute of Technology and
Science • 2019-2023.

7.21- CGPA

BCA – Christ (Deemed to be
UNIVERSITY) • 2016-2019.

8.92- CGPA

Senior Secodary school – Army
Public School Bathinda • 2014-
2016.

77.8 %

INTERESTS

Gym
Table Tennis
Watching Movies/Anime
Cricket
Reading
Travelling

- Complete migration from SAP CAP Classic (Spring) to SAP CAP New Gen (Spring boot)
- **Implemented messaging queue to increase the performance of the solution by 10 times.**
- Whitelisted the application services and tables using service broker for extensibility.
- Implemented the concept of feature toggle to hide and unhide a feature based on the tenant.

SAP S4 HANA Procurement - (Software Developer – May 2020 - June 2021)

SAP S4 HANA Procurement is a cloud-based procurement solution that enables companies to align their procurement processes on one platform.

Achievement's/Task's

- Developed and coded core modules with major business functionalities, aligning them with client expectations and setting the foundation for other modules within the system.
- Core member for Vyper Framework (UI Test Automation tool)
- Worked with project managers, developers, quality assurance and customers to resolve production issues.

SAP SuccessFactors - (Software Developer – August 2019 – April 2020)

SAP SuccessFactors is an HR tool that provides cloud-based software for human capital management (HCM), using the software-as-a-service (SaaS) model. It incorporates core HR and talent management features, offering its customers various deployment options that tend to specific solution needs.

Achievement's/Task's

- Completed PoC on integration with One Master Data (ONEmds) and integrated with it.
- Added visibility handling features based on the custom configuration maintained by the customer.
- Worked on couple of processers and validation classes and written j-units for the same.
- Interaction with customers and solving incidents raised by them or any support needed for setting the system.

INTERNSHIP

SAP LABS INDIA PVT. LTD. • APRIL 2018 – MAY 2018

- Worked with SAC (SAP Analytical Cloud) on how we can fetch live data from Twitter and perform predicative analysis based on sentiment analysis on the tweets and their geographical location with help of live HANA DB connection and Kafka.

PROJECTS

- Created a **time-series model using Facebook Prophet** to predict the load on the system which can help in predictive autoscaling instead of reactive autoscaling.
- Implemented a smart agriculture solution with the help of IoT where we can monitor complete farm and perform multiple operation works with the help a mobile application.
- Worked on a cross - country project where we build a solution which can bring transparency in the complete supply chain with the help of Blockchain.

ACHIEVEMENTS

- SAP CAP Java trainer at SAP Labs India.
 - Java and SAP BTP (Cloud Foundry) Consultant at SAP Labs India.
 - Patent under process with topic "**Optimized conversions using SAP HANA Graph Engine.**"
 - Shadowing Kulmeet Bawa (President and MD, SAP Indian Subcontinent).
 - Selected as the Catalyst (Most emerging employee in SAP) for "**AI & Data Science Catalyst Pool**" for the year 2024-2026.
