PROJECTS

SKILLS

Java Script

React Js

Node Js

Python (Basic level)

EXPERIENCE

PERN Stack Developer

01/10/2021 - -

Krify Software Technologies

- Developed and maintained multiple web applications using the PERN (PostgreSQL, Express.js, React.js, Node.js) stack.
- Designed and implemented RESTful APIs for seamless communication between front-end and back-end systems.
- Implemented authentication and authorization mechanisms to ensure data security and user privacy.

ACHIEVEMENTS & AWARDS

Recognized as the lead project developer for Maddog Casting Project from 01/02/2022 - Present.

Successfully planned and coordinated the AAVISHKAR-2K20 Tech Fest, attracting 500+ Students from Ap District Level .

ACTIVITIES

Lead Coordinator in Tech-fest "AAVISHKAR-2K20" held at AKNU MSN Campus, Kakinada.

Participated in Python Programming work-shop "Data Science, Mathematical & Statistical Analysis Using Python" held at VSM College, Ramachandrapuram.

Maddog (Film Production Collaboration Platform)

Role: Lead Developer

Responsibilities:

Designed and implemented the architecture of the platform using React JS for the frontend and Node JS for the backend.

Integrated PostgreSQL database for efficient data storage and retrieval.

Implemented features for managing extras (background artists) opportunities and providing services to production casters.

Conducted regular maintenance and troubleshooting to ensure the platform's smooth operation.

Participated in "python programming" work shop held by APSSDC.

Chits App (Payment Calculation Module)

Role: Frontend Developer

Responsibilities:

Maintained and enhanced the Chits App according to client requirements, ensuring its functionality met their needs.

Developed the payment calculation module within the Film Casting Management System.

Designed and developed functionality for calculating payment details and amounts for artists based on shoot days.

Utilized React JS for the frontend and Django for the backend, ensuring seamless integration with the existing system.

Conducted testing and debugging to identify and resolve any issues or bugs.

Lookbook (Artist Management and Document Sharing Platform)

Role: Lead Developer

Responsibilities:

Provided maintenance and support for Lookbook, optimizing its performance and functionality.

Led the development of a platform for seamless exchange of artist details and appearance documents between film production and casting organizations.

Utilized React JS and Node JS technologies for frontend and backend development, respectively.

Integrated PostgreSQL database to store and manage artist details and documents securely.

Streamlined the process of sharing documents such as PDFs, enhancing collaboration efficiency between stakeholders.

Conducted regular updates and enhancements based on user feedback and changing requirements.
