Overview

As an individual with keen interest in problem solving, I always look up to challenges and ways of solving them while maintaining punctuality and consistency.

Experience

SAP LABS India [August 2019 – Present]

Full Stack Developer

Nov 2023 - Present

ISBN Product Success CDET

- Developed multiple security and observability enabled **REST API** endpoints using **Spring boot** Framework in **Java**.
- Developed **React based dynamic UI** Views for Self Service Tenant Provisioning Configuration Manager
- Built complete **CI/CD** infrastructure from ground up including product quality, delivery and deployment pipelines on **Jenkins** using **Groovy** and **Shell**
- Enabled **Hashicorp Vault** integration with application for secrets management
- Integrated Security and Vulnerability tools like **Mend** (previously Whitesource), **Checkmarx** and **GhAS**
- Implemented Database change management and version control using **Liquibase**.

Associate Full Stack Developer

July 2021 – Nov 2023

SAP CX C4C Sales

- Developed **Java** based **REST** and **GRPC** Service endpoints for inter and intra **microservice** communication.
- Developed and designed Multiple UI Views using **Angular** Web Components and Figma
- Upheld Code Quality Standards using tools and frameworks like **Jacoco**, **Karma**, **Jasmine**, and **Sonar**
- Actively contributed to resolving customer incidents and escalations, providing **hotfixes** and **emergency patches** in **ABAP** and **SAP UI Designer** based SAP CX Suite.
- Collaborated with Cross functional teams to consume and provide end to end features across all **microservices**.
- Deployed and maintained microservice pods using **Docker** and **Kubernetes**

Frontend and Automation Developer

May 2020 – June 2021

S4 Hana Procurement

- Contributed to UI feature development using **SAP UI5** and overall code quality improvement for Procurement Purchase Requisitions module.
- Represented S4 Procurement to develop **SAP UI5 Automation** tool '**Vyper**' and integrated it with the existing product to improve overall product quality.
- Worked extensively on creating multiple **Jenkins** pipelines and integrating **Vyper** with it to improve the overall **CI/CD** flow.

Full Stack Developer

Aug 2019 – April 2020

SAP Asset Intelligent Network

- Contributed to publishing all Public APIs to **SAP API Business Hub** using tools like **Swagger** and **Open API**
- Worked on extensive feature developments in **SAP UI5** for SAP Asset Intelligent Network Locations
- Collaborated with multiple teams to migrate monolithic services from **HANA Classic** to **HANA XS**

Freelancing Commercial Projects [August 2018 – June 2019]

- Multichain Marketing System
- Appointment Booking System
- POS System
