PROFILE

A focused engineering professional with expertise in various software packages . Coupled with the creative thinking , problem solving and the ability to prioritise the workload effectively alone and as a team. Highly flexible and adaptable to all environment .

PROFESSIONAL EXPERIENCE

IntelliRose Software India Private Limited

Software Developer

07/2023 – present
Bengaluru, India

Developed Logics 2.0 web application from scratch. Analysed and created the work flow and architecture of the Logics 2.0 application from scratch and designed the application and working functionality flow. Integrating restful APIs. Tax solution, rendering forms, billings, payment integration, E-sign these are the key features that I have implemented in the logics 2.0 project.

Managing juniors and currently work as a senior front end developer for this project.

Worked in Native application for the same project using React Native

Technology infrastructure: React js, Kendo React, HTML, CSS, Redux, React Native, Typescript, Javascript

MediaKind

Designed and developed user friendly TV apps for video streaming and live streaming. Tested, maintained and fixed existing bugs.

Implemented several stories and features . Worked on Apple TV, iOS apps and OTT TV apps.

Have end to end knowledge in MediaFirst. Worked in continuous testing and checking each features from scratch to end of various OTT applications. Unit testing, Functional testing, UI testing and user experience testing done.

Worked for applications having 1+ million users. Experience working in an environment with a variety of developers at different levels. Knowledge of software and application design .

Projects Handled: MaxTV Stream, SRT Project (Zixi), WOM, SaskTel, VFQ(Vodafone Qatar), TMO

Technology infrastructure : React Native, Redux, JSON

06/2022 – 06/2023
Bangalore, India

Gizmeon Technologies

Worked in a startup work culture. Mentored and guided 4-5 juniors.

Gizmott - Implemented features on a dashboard for uploading contents for websites which is a complete OTT backend dashboard, handled frontend related works including APIs, subscription flow for various platforms and ad server setup.Developed reusable, scalable, optimised and maintainable React components. Familiarity with RESTful APIs.

A dashboard developed for managing and handling OTT apps. The dashboard contains various kinds of reports and analytics .

Technology infrastructure : React.js, Redux, Node.js, PostgreSQL, BigQuery

OTT Web Apps

Created OTT platforms from scratch (Chicano Hollywood). Developed and modified several OTT platforms according to customer interest .

Validation and development knowledge of all UI and workflow functionalities in web applications (Chrome, Safari, Edge...etc.) and different Android and iOS devices.

Integrated Payment gateways (Stripe, PayPal) and Social media platform. Optimised applications for maximum speed and scalability

Tested, deployed and maintained several web applications. Have good knowledge of testing terminologies used - Test case, Test scenario, Functional testing, UI testing, and user experience test. Created a fully functional dashboard using Looker.

Projects Handled: CeyFlix, Boondock Nation, Just watch me, ISG TV, Chicano Hollywood.

Technology infrastructure :React.js, HTML, CSS, JS, JSON, Redux, Looker, Typescript, Java, Microservices, Spring Boot

04/2021 – 06/2022
Kochi, India

SKILLS

Programming Knowledge

React js, React Native, Redux, Javascript (JS), Java, JSON, C, C++, CSS, HTML, Looker, MySQL, git, Github, Node js, GraphQL, Bootstrap, Microservices , Typescript, Spring Boot

Other Software

Tortoise SVN, Jira, Azure DevOps, Slack, Latex, XCode, Jenkins, Charles

OS

Linux, Windows, Mac

VOLUNTEER EXPERIENCE

Technical translator

Technical translator of NPTEL courses of various engineering subjects , AICTE - Swayam

04/2020

Camp Coordinator

Rapid visual screening of buildings , data collection and sorting , Kerala Flood Rehabilitation Works, Chalakkudy Grama Panchayath

08/2018

PROJECTS

Deep neural network optimisation

The artificial neural network are compressed by pruning the unwanted connections and size is reduced.

Technology infrastructure : **Python, Machine Learning**

08/2019

Solar mobile charger with rain water sensor

A cost effective charger which can be used in any kind of mobile phones where the user can alter the output of the current according to their phone

11/2018

COURSES

Looker

Attended a 2 month direct training program from Looker team. Developed and tested dashboard using Looker which contains various features like reports , charts , graphs and components
Technology used: **LookML, BigQuery, PostgreSQL, MySQL**

11/2021 – 01/2022

EDUCATION

B.Tech Information Technology

Government Engineering College, Palakkad
CGPA: 7.37

Higher secondary school

Vivekodayam Boys HSS, Thrissur
Secured 90%

SSLC

St. Paul's CHSS, Thrissur
Secured 96%
