Linkedin: amitsingh977
Leetcode:Amit_977

Experienced software engineer with expertise in Java, Spring Boot, REST API design, Python, and MySQL. Proficient in Object-Oriented Analysis and Design (OOAD) and agile methodologies. Recognized for delivering results on time through proactive problem-solving. Eager to apply technical skills to collaborative teams and thrive in a growth-focused environment.

EDUCATION

Bachelor of Technology, Computer Science , <i>University Of Petroleum & Energy Studies</i>	AUG 2022
Intermediate , <i>Sri Chaitanya Vidya Niketan</i>	AUG 2017
AISSCE , <i>Delhi Public School Balco</i>	JUNE 2015

TECHNICAL SKILLS

Languages	Java,Python,GO.
Framework	Spring , Spring Boot
Database	MySQL,Mongo DB,Clickhouse
Tools	Git, SKubernetes, Docker, Grafana, GCP

TECHNICAL EXPERIENCE

Associate Software Engineer <i>Rakuten India,Bengaluru</i>	JULY 2022 — PRESENT
--	----------------------------

- Developed Auditing tool with Rollback feature reducing manual work and enabled version control for Jobs.
- Extracted job status and metrics for user insights.
- Design and implementation of the feature to manage dependencies between pipeline jobs.
- Created a Grafana dashboard for profiling metrics of Data Wrangler and other platform tools.
- Incorporated Code optimization and refactoring with Managing, Monitoring and Troubleshooting
- Developed an Airflow SDK for efficient creation and management of DAGs with multiple functions.
- TECH- Restful APIs, Java, Spring Boot, Python, Flask Airflow, Hibernate, MySQL, Redis, Maven, Git, Grafana, GCP.

Technical Intern <i>Rakuten India</i>	JAN 2022 — JUNE 2022
---	-----------------------------

- Participated in code reviews and contributed to best practices and coding standards.
- Clean up and optimization of SQL statements before injecting them into SQL parser.
- Worked on DAG creation and monitoring on Airflow with the help of Data-Wrangler.
- Continuously learn and improve technical skills.

PROJECTS

Data Wrangler *Rakuten*

- Data Wrangler is an application that helps data engineers to build data pipeline jobs very quickly and schedule them on Airflow.
- Support for different types of tasks such as executing queries on different execution engine.
- Extract and export large data and upload data to nfs locations etc.

Auditing tool *Rakuten*

- Implementation for comprehensive audit trail system to monitor and log all CRUD activities(E.g Datawrangler)
- Integration of rollback feature for microservices, enabling precise version reverts in case of issues.
- Ensured granular access control with role-based access to safeguard data integrity and version control.
- Conducted rigorous testing, guaranteeing successful rollbacks without data loss and comprehensive auditing.

Ingestion as a service(IAAS)

Rakuten

- Standardized process to ingest data across the organisation to enable different BUs to explore and use all kinds of data present in multiple sources
- Reduced the time taken up and ingestion pipeline by 30%
- Reduced the number of resources working on ingestion by 40% because of standardisation of the ingestion process
- Inclusion of Kafka based ingestion, file based ingestion and Ingestion for unstructured and semi structured data

Billing tool

Rakuten

- Microservice for billing of data platform tools based on their resource usages.
- Easy Integration with platforms tools to generate a detailed report on a scheduled date.
- Reducing 50% manual work of cloud teams to access reports and mapping it to users.

COURSES & CERTIFICATION

Data Warehouse Concepts, Design, and Data Integration, Coursera	JUL 2020
Software Development Processes and Methodologies, Coursera	MAY 2020
Design and Build a Data Warehouse for Business Intelligence Implementation, Coursera	JUL 2020

EXTRA CURRICULAR ACTIVITIES

Actively participated in Google Hash Code.
Completed the Hacktoberfest Challenge.
Member of Corporate Social Responsibility(CSR).
Member of Computer Society Of India(CSI).
