Work Experience

I 2

September 2023 - December 2023

Web Developer Intern

Dubai, UAE, Remote

- Led an 8-person team in developing the I2 business site landing page, focusing on optimizing user experience through the application of modern design tools such as Tailwind, Radix UI, and Shaden UI.
- Successfully implemented a blogging system and effectively managed pull requests from contributors using TypeScript, Next.js, and Node.js.
- Innovated processes, resulting in a remarkable 75% acceleration of development cycles and a substantial improvement in code maintainability. Demonstrated expertise in JavaScript, React.js, and Node.js.

SKILZEN

April 2022 – July 2022

Front-end Developer Intern

Hyderabad, Remote

- Collaborated within the front-end team to develop a web platform by translating a Figma design into a set of highly responsive and modular functional components using Next.js and TypeScript.
- Designed and implemented the backend architecture for a file storage system with concurrent public and private accessibility. This involved leveraging MySQL Workbench and integrating efficient file upload functionality.
- Implemented the back-end architecture for the file storage system, ensuring optimal server-side performance. Utilized Docker for containerization, contributing to streamlined deployment processes.

Education

Inderprastha Engineering College

August 2020 – June 2024

BTech. Information Technology, SCGPA 7.5

Uttar Pradesh, India

Courses: Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence (AI), Machine learning ML, Design Optimization, Web Socket, Web Technology, Computer Network, Database Management, Blockchain, Web RTC, Project Management.

Technical Skills

Languages: Python, JavaScript, Java, HTML/CSS, Postgre SQL, React, Next.js 13, Typescript, PHP, Drupal

Development Tool: CircleCI, Gradle, Git, Kubernetes, Jenkins, Laravel, clerk, strip, PlanetScale

Software/Platforms: VS Code, Eclipse, GitLab, Android Studio, MongoDB, Prisma, AWS, Glitch, Docker

Certificates: Frontend Development, Software Engineer, Javascript, React.js, Problem Solving DSA, Python, SQL, C#, GO

Projects

DocuMation — Note-taking web application [↗](#) | Next.js 13, React, Convex, Tailwind, MySQL, Clerk

- * Developed DocuMation, a full-stack project using Next.js 13 and React, with Convex database integration for robust project management.
- * Integrated rich media embedding features, enabling users to seamlessly incorporate images, videos, and files into their notes and pages for comprehensive project documentation.
- * [GitHub Repository](#)

BookmyRoom — From homes to hotels [↗](#) | Next.js, React, Tailwind, Prisma, MongoDB, NextAuth

- * Full-stack web application designed to simplify travel experiences by seamlessly connecting travelers to memorable experiences and a range of accommodations.
- * Users can seamlessly browse, book, and manage accommodations worldwide through the intuitive interface. Stay connected, plan your travel, and experience hassle-free booking with BookmyRoom.
- * [GitHub Repository](#)

AI Express — SaaS Platform [↗](#) | Next.js 13, React, Tailwind css, Prisma, Stripe, TypeScript, Postgresql

- * AIExpress- web application Hosted five distinct AI tools within the application, covering image and video generation, conversation models, and code generation to meet diverse creative needs.
- * User engagement through the strategic use of React, Next.js, RestAPIs, and Material UI. Implemented subscription-based monetization beyond the free tier, allowing users to opt for a monthly subscription.
- * [GitHub Repository](#)
