- Security/Quality/Testing Tools
 - HP Fortify SCA, WebInspect, SonarQube & YourKit

Achievements

- As technical Manager was involved in multiple system/applications to the new technology upgrade/migration (most of them big-bang approach) for various customers located in Africa continent, Singapore & India
- Successfully developed an in-house application which replaced the expensive 3rd party software (Siebel) and helped to save company's cost.
- The above same in-house application was later improvised and used as a product to deploy in various projects across Africa and Middle East.
- Successfully helped company's low profit-making project into one of the highest profit-making project by introducing improvements, resolving application/customer issues and upgrading the h/w &

application software. It's a SI project serving to the Ministry of Finance, Government of India, and the customer claim now it's generating 30% of their total revenue.

- Successfully managed and helped to turn a ME Asia's SI project into profit making project for the company, it was long running in losses and an unhappy customer, few millions of dollar were due by the customer to the company who eventually paid after successfully resolving issues & upgrading the h/w & application software.
- Lastly, took over another company's ME Asia SI project for which company owe 3000+ man days of delivery within short duration of time, this was accomplished successfully with limited resources and tight timeline.

Projects

Project	Oman Integrated Customs Management System and Electronic Single Window (ICMS/ESW)
Location	Muscat, Oman
Domain	Trade
Customer	Royal Oman Police, Oman
Main Project Features	Oman Integrated Customs Management System and Electronic Single Window (ICMS/ESW) project is aimed at building an integrated Customs e-Government service which facilitates secure international trade facilitation in Oman.
